Pocket Hanger

For years we've been asked if there was a pocket and hanger all-in-one. Now we can happily say, yes! This great addition to our line will allow you to display your ID, membership, access or proximity card directly from your rearview mirror.

Display it!™

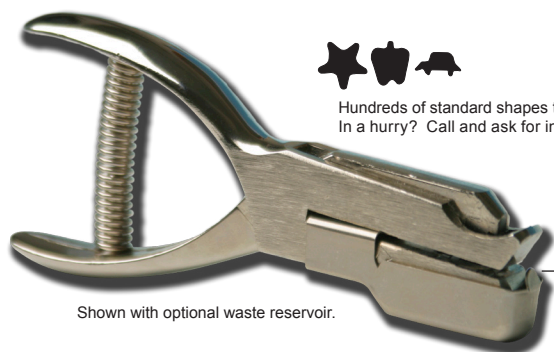

We invented this product over two decades ago! It's the product that started our company! Made of patented plastic specifically designed to withstand the extreme effects of heat cold and sun with its added UV ray inhibitors. To use simply place your decal onto the plastic then press the suction cup to any clean dry glass.

Accessories

Heavy Duty Punch

This **Heavy Duty Punch** is hand crafted—one at a time — from rustproof aircraft quality castings. It's a long process but what you get is a unique shape that die cuts your paper or plastic card. When customers need a way to authenticate or validate on-site this punch comes to the rescue!

Adhesive Hanger

The **Adhesive Hanger** holds permits, displayers, access or proximity cards on your rear view mirror for easy visibility.

Elastic Loop

The **Elastic Loop** is designed to loop through your permit or displayer and then dangle from your rearview mirror. This makes your permit or displayer easily visible for parking officers.

Elastic Loops make permits more visible for officers!

Suction Cup

Added UV stabilizers resist yellowing and weather deterioration. The light diffusing ridges help prevent sunbeams from concentrating a "magnifying glass" type focus into your vehicle. Cheap imitations have actually burnt holes into dashboards, so avoid "look-alikes!"

Don't get burned by cheap "look-alikes"!
